Question: 1

Use this table to configure the parameters displayed on a project card on the My Projects Space page of the Project Workspace.

- A. pm_project
- B. pm_toplevel_project
- C. pm_home_page_config
- D. project_template_config

Answer: C

Explanation:

According to the ServiceNow documentation¹, the pm_home_page_config table is used to configure the parameters displayed on a project card on the My Projects Space page of the Project Workspace. The other tables are used for different purposes:

pm_project: Stores information about projects².

pm_toplevel_project: Stores information about top-level projects³.

project_template_config: Stores information about project templates.

Question: 2

The Business Unit field on a Project or Demand form displays values from a specific table. What type of field is this?

- A. Journal.
- B. Reference.
- C. Conditions.
- D. List.

Answer: B

Explanation:

According to the ServiceNow documentation¹, the Business Unit field on a Project or Demand form is a reference field that displays values from the cmn_department table. A reference field stores a link to a record on another table, rather than storing the data directly in the field².

Question: 3

What role can configure the default columns in the project planning console?
Choose 2 answers

- A. it_pps_admin
- B. it_project_manager
- C. it_console_admin
- D. admin

Answer: AD

Explanation:

According to the ServiceNow support article¹, the it_pps_admin role can configure the default columns in the project planning console by modifying the pm_project_planning_console list view. The admin role can also do this, as well as any other configuration on the platform².

Question: 4

Which demand category would a demand manager select, if they need to create an enhancement?

- A. Defect
- B. Change
- C. Operational
- D. Strategic

Answer: C

Question: 5

As a demand manager, you can view an artifact from a demand. What artifacts are part of a demand?

- A. Stories, Vulnerability Tasks, Enhancements.
- B. Incidents, Problems, Change.
- C. Decision, Risk, Requirements.
- D. Project, Defect, Requests.

Answer: C

Explanation:

According to the ServiceNow documentation¹, a demand manager can view and edit the following artifacts from a demand:

Decision: A decision that affects the demand or its outcome².

Risk: A risk that could impact the demand or its outcome³.

Requirement: A requirement that defines the scope or functionality of the demand⁴.

The other options are not artifacts of a demand, but rather related entities that can be created from a demand or linked to a demand.
