Question: 1

How does vRO integration benefit the management of virtual infrastructures in VMware TCA?
Response:

- A. It simplifies physical hardware upgrades.
- B. It automates tasks and processes across cloud services.
- C. It increases the speed of data transfer between devices.
- D. It reduces the need for manual system checks.

Answer: B

Question: 2

When evaluating CNF or VNF faults from a VMware Telco Cloud Automation dashboard description, which steps are essential?

(Choose Two)

Response:

- A. Check the connectivity status of all linked nodes.
- B. Review the event log for recent warnings or errors.
- C. Verify the version compatibility of hardware components.
- D. Analyze the fault management tab for specific error codes.

Answer: B,D

Question: 3

In terms of infrastructure automation, what does versioning control effectively manage?

Response:

- A. Increase in data breaches
- B. Conflicts arising from simultaneous changes
- C. Inconsistency in user interface designs
- D. Reduction in automation scope

Answer: B

Question: 4

During the NS life cycle, continuous _____ is crucial to ensure service reliability and performance.

Response:

- A. auditing
- B. monitoring
- C. costing
- D. advertising

Answer: B

Question: 5

What is the primary function of VMware Telco Cloud Automation (TCA) within the Network Functions Virtualization (NFV) architecture?

Response:

- A. To provide virtual network functions (VNFs) and containerized network functions (CNFs)
- B. To manage hardware resources
- C. To automate the deployment and orchestration of network services
- D. To monitor network performance

Answer: C

Question: 6

Which of the following are types of TKG clusters?

(Choose Two)

Response:

- A. Management cluster
- B. Workload cluster
- C. Data cluster
- D. Resource cluster

Answer: A,B

Question: 7

Given a system problem in VMware Telco Cloud Automation, which log file should be primarily viewed to troubleshoot a connectivity issue?

Response:

- A. User activity log
- B. Network event log
- C. Installation log
- D. Security audit log

Answer: B

Question: 8

What are the key business benefits of automated CaaS deployment?

Response:

- A. Reduced IT operational costs
- B. Increased production of physical servers
- C. Enhanced manual configuration processes
- D. Accelerated application delivery

Answer: A,D

Question: 9

Which of the following steps is critical when deploying a Workload cluster in a no-internet environment?

Response:

- A. Configuring an external DHCP server
- B. Ensuring each node has a static IP address
- C. Setting up a direct connection to VMware support
- D. Using a local mirror for all container images

Answer: D

Question: 10

How does VMware TCA assist in the Life Cycle Management of NFV components?

(Choose Two)

Response:

- A. By offering predictive maintenance capabilities

-
- B. By automating deployment and update processes
 - C. By providing detailed logs and alerts for network operations
 - D. By enforcing security policies across virtual network functions

Answer: B,C
