## Question: 1

Which factors should be considered when designing Cisco APIC deployment?

(Choose two)

Response:

- A. Environmental conditions
- B. Scalability needs
- C. Color scheme of the hardware
- D. Disaster recovery plans

**Answer: B,D**

## Question: 2

When designing QoS for inter-pod and inter-site networks in Cisco ACI, what factors must be prioritized?

(Choose Three)

Response:

- A. Bandwidth limitations
- B. Latency optimization
- C. Packet loss minimization
- D. Color-based marking
- E. Priority settings based on traffic type

**Answer: A,B,C**

## Question: 3

Select effective design approaches for Cisco ACI external Layer 3 connectivity.

(Choose Two)

Response:

- A. Integration with existing MPLS infrastructure
- B. Exclusive reliance on external routers
- C. Use of OSPF for dynamic routing
- D. Manual routing for better control

**Answer: A,C**

### Question: 4

What should be prioritized when designing L4-L7 service insertion in Cisco ACI MultiPod environments?  
Response:

- A. Ensuring all pods have identical service appliances
- B. Centralized management of services
- C. Localized services in each pod
- D. Minimal service configuration

**Answer: C**

### Question: 5

Which of the following are management options in Cisco ACI?  
(Choose two)  
Response:

- A. Out-of-band only
- B. In-band only
- C. Combination of in-band and out-of-band
- D. None of the above

**Answer: A,B**

### Question: 6

Bridge domains in Cisco ACI must be carefully designed to ensure proper \_\_\_\_\_ configuration.  
Response:

- A. power
- B. subnet
- C. cooling
- D. hardware

**Answer: B**

### Question: 7

---

Why would a network administrator configure syslog in Cisco ACI?

Response:

- A. To improve the speed of the network
- B. To log and monitor system events
- C. To increase the number of manageable endpoints
- D. To implement quality of service (QoS)

**Answer: B**

### Question: 8

In terms of access policy components, what does an 'Endpoint Group' (EPG) in Cisco ACI define?

Response:

- A. A collection of physical and virtual endpoints that share the same security requirements
- B. A unique identifier assigned to each device within the ACI fabric
- C. The bandwidth limits for a group of applications
- D. A list of approved user groups allowed to access network resources

**Answer: A**

### Question: 9

How should Cisco ACI Multi-Site design be optimized for service continuity and disaster recovery?  
(Choose Three)

Response:

- A. Redundant physical links between sites
- B. Uniform appliance deployment across sites
- C. Geographic distribution of critical services
- D. Centralized management from a single site
- E. Automated failover mechanisms

**Answer: A,C,E**

### Question: 10

Describe a feature of the initialization process for Cisco ACI fabric.

Response:

- A. Sequential device boot-up

- 
- B. Randomized switch integration
  - C. Manual switch configuration
  - D. Automatic spine and leaf discovery

**Answer: D**
