Question: 1

What collation setting is recommended for optimum performance and stability in Automation Suite?
Response:

A. SQL_Latin1_General_BIN
B. SQL_Latin1_General_BIN2
C. SQL_Latin1_General_CP1_CI_AS
D. SQL_Latin1_General_CP1_CS_AS

Answer: C

Question: 2

Specialized agent nodes in an Automation Suite Kubernetes cluster are responsible for which of the following?
Response:

A. Running UiPath products and shared components.
B. Running special workloads like Task Mining analysis and Document Understanding pipelines and Automation Suite Robots.
C. Managing cluster state.
D. Performing workload orchestration.

Answer: B

Question: 3

Why is LVM used for partitioning disks in the Automation Suite installation?
Response:

A. To enhance the security of the disk.
B. To support multiple file systems on the same disk.
C. To alter the disk size easily without data migration.
D. To increase the read/write speed of disks.

Answer: C

Question: 4

What is the way to install UiPath Task Mining?
Response:

A. Using bash script on a server with OpenShift.
B. Standalone installation on a RHEL server.
C. Install it using MSI on a Windows machine.
D. Using the Automation Suite installer.

Answer: D

Question: 5

Can you deploy lower-spec machines for the secondary cluster?
Response:

A. Only if both clusters are in the same region.
B. No, both clusters must have identical specs.
C. Yes, to save costs when certain products are not installed.
D. Yes, but only during off-peak hours.

Answer: C

Question: 6

Which is the required prerequisite for migrating Automation Suite on Linux to Automation Suite on EKS/AKS?
Response:

A. Automation Suite version should 2022.10.4 or above.
B. SQL version should be 2019 Standard or Enterprise Edition.
C. Automation Suite on Linux should be migrated to a new installation of Automation on EKS/AKS.
D. In case Active Directory integration is enabled, make sure you disable it before starting the migration.

Answer: C

Question: 7

How much storage is required for a medium-sized robot on an Automation Suite Robots node?

Response:

A. 10 GiB
B. 4 GiB
C. 8 GiB
D. 6 GiB

Answer: B

Question: 8

During troubleshooting, you are restarting the Rancher Server Service. Which of the commands can be used to achieve that?
Response:

A. systemctl restart rke2-agent
B. journalctl -u rke2-server
C. systemctl restart rke2-server
D. systemctl stop rke2-server

Answer: C

Question: 9

In the "Automation Infrastructure Engineer Workflow Map", the activity "Create architecture diagram" is part of which step?
Response:

A. Design
B. Deployment
C. Maintenance
D. Analysis

Answer: A

Question: 10

When is configuring the temporary Docker registry required?
Response:

A. For offline installations using an external OCI-compliant registry.
B. For online installations.

C. For offline installations using an in-cluster registry.
D. For all installations.

Answer: C
