Question: 1

Why is Helm important for AAKE deployment?

Response:

- A. It provides a container orchestration platform
- B. Helm is a Kubernetes package manager for deploying applications
- C. Helm manages SSL certificate deployment for Automic Automation
- D. Helm optimizes load balancing configurations for Kubernetes clusters

Answer: B

Question: 2

How can you enable TLS for Automic Automation components in AAKE?

Response:

- A. By configuring SSL certificate deployment settings in Helm charts
- B. By modifying the values.yaml file to include TLS parameters
- C. By implementing an SSL bridge for secure communication
- D. By deploying an additional load balancer for TLS termination

Answer: B

Question: 3

When installing the AE, the JWP is mandatory. Where is the JWP configured?

Choose two answers

Response:

- A. In the UC4Config.xml file for the AWI
- B. In the ODBC section of the UCSRV.ini file
- C. In the JWP section of the UCSRV.ini file
- D. In the JDBC section of the UCSRV.ini file
- E. In the LUCENT section of the UCSRV.ini

Answer: C,D

Question: 4

During the installation process, what does Helm use to configure and deploy resources in Kubernetes?
Response:

- A. YAML files
- B. JSON files
- C. Docker images
- D. SSL certificates

Answer: A

Question: 5

What does the db directory contain?
Response:

- A. A license file
- B. Automation Engine installation files
- C. The Service Manager dialog
- D. Data structures and assets

Answer: D

Question: 6

Which Service Manager file is used to define the AWA services that should be started automatically?
Response:

- A. UC4sml
- B. UCYBSMgr.ini
- C. UC4.smc
- D. UC4.smd

Answer: C

Question: 7

Which component of the AAKE package do you extract values.yaml from?
Response:

- A. The HELM chart
- B. The HELM plugin
- C. The image pull JSON file
- D. Values.yaml is a standalone file available on downloads.automic.com

Answer: A

Question: 8

How does Analytics contribute to an Automic Automation upgrade?
Response:

- A. Manages load balancing configurations for Analytics data
- B. Facilitates automatic API provisioning for Analytics
- C. Optimizes SSL certificate deployment settings for Analytics
- D. Provides insights into system performance during the upgrade

Answer: D

Question: 9

During installation on Unix, what is the role of the Database Server?
Response:

- A. Store log files and audit trails
- B. Manage user authentication and authorization
- C. Store configuration data and job information
- D. Optimize SSL certificate deployment settings

Answer: C

Question: 10

Which key types are commonly used in the TLS/SSL infrastructure for secure communication?
Response:

- A. Public key and Private key
- B. Session key and Symmetric key
- C. API key and OAuth token
- D. Load balancing key and SSL key

Answer: A,B
