Question: 1

How can administrators ensure security when using custom inputs?
Response:

A. By using encrypted fields for sensitive data
B. By disabling all user-defined inputs
C. By restricting inputs to predefined lists only
D. By enforcing static values for all provisioning processes

Answer: A

Question: 2

Which role types are commonly used in Morpheus?
(Select two.)
Response:

A. API-Only User
B. Network Supervisor
C. Tenant Admin
D. Read-Only User

Answer: C,D

Question: 3

In what scenarios are custom inputs useful in Morpheus?
(Select two.)
Response:

A. Provisioning dynamic virtual machines based on user selections
B. Limiting deployment configurations to a single cloud provider
C. Automating workload scaling based on user-defined thresholds
D. Blocking all changes to predefined instance templates

Answer: A,C

Question: 4

What are best practices for configuring Morpheus after installation?
(Select two.)
Response:

A. Limiting API access for automation
B. Setting up integration with cloud providers
C. Disabling built-in security features
D. Configuring role-based access control (RBAC)

Answer: B,D

Question: 5

How can custom inputs be used in Morpheus?
Response:

A. To override system-level policies
B. To provide user-defined values for provisioning instances
C. To replace all default configurations with static inputs
D. To restrict workflow execution to specific users

Answer: B

Question: 6

What are best practices when managing Infrastructure Groups in Morpheus?
(Select two.)
Response:

A. Restricting access to groups at the instance level
B. Configuring group-level permissions using RBAC
C. Assigning groups to specific cloud integrations
D. Limiting groups to a single cloud type

Answer: B,C

Question: 7
