Latest Version: 6.0

Question: 1

What is the purpose of a learning rate in neural networks?

Response:

- A. To measure model accuracy
- B. To determine how quickly the model adapts to the training data
- C. To visualize the dataset
- D. To reduce overfitting

Answer: B

Question: 2

Which technique is commonly used for Natural Language Processing (NLP) tasks?

Response:

- A. Support Vector Machines
- B. Recurrent Neural Networks
- C. Decision Trees
- D. K-Nearest Neighbors

Answer: B

Question: 3

What are the "three abilities" AI systems should possess according to the conceptual model?

Response:

- A. Perception, Reasoning, Action
- B. Cognition, Learning, Implementation
- C. Recognition, Analysis, Execution
- D. Visualization, Reasoning, Action

Answer: A

Question: 4

Which types of AI are based on their capabilities and level of intelligence?

Response:

- A. Universal Artificial Intelligence (UAI)
- B. Artificial Superintelligence (ASI)
- C. Artificial General Intelligence (AGI)
- D. Artificial Narrow Intelligence (ANI)

Answer: B,C,D

Question: 5

What is the role of Generative AI in healthcare applications?

Response:

- A. Disease Prediction
- B. Image Generation
- C. Speech Recognition
- D. Reinforcement Learning

Answer: B

Question: 6

Which of the following are key performance metrics used to evaluate AI models?
(Select TWO)

Response:

- A. Precision
- B. Encryption Rate
- C. Recall
- D. Gradient Descent

Answer: A,C

Question: 7

Which characteristics distinguish Generative AI and LLMs from traditional AI systems?

Response:

- A. Ability to generate creative and grammatical text

- B. Limitation to specific domains
- C. Training on large, diverse datasets
- D. Dependence on pre-programmed rules

Answer: A,C

Question: 8

Which AI technology focuses on developing algorithms that improve with experience?

Response:

- A. Genetic Algorithms
- B. Deep Learning
- C. Machine Learning
- D. Evolutionary Programming

Answer: C

Question: 9

What is the main benefit of using cloud platforms for deploying AI models?

Response:

- A. Increased Security
- B. Improved Accuracy
- C. Scalability and Flexibility
- D. Reduced Dataset Size

Answer: C

Question: 10

Which type of AI possesses the ability to understand, learn, and apply knowledge across a wide range of tasks at a level comparable to human intelligence?

Response:

- A. Artificial Superintelligence (ASI)
- B. Artificial General Intelligence (AGI)
- C. Artificial Narrow Intelligence (ANI)
- D. Universal Artificial Intelligence (UAI)

Answer: B
